

SOHAM RAHUL KAMAT

Thane, Maharashtra, India | +91 98333 83225 | kamatsoham28@gmail.com | linkedin.com/in/sohamkamat28 | github.com/sohamkamat28

EDUCATION

K.J. Somaiya School of Engineering	Mumbai, India
<i>Bachelor of Technology in Artificial Intelligence and Data Science CGPA: 9.98/10</i>	2024 - 2028
12th Grade (HSC) - 95.66%	2024
Secured the top rank in Thane District in the Maharashtra HSC Board Examination	
10th Grade (ICSE) - 98.2%	2022
Elected Head Boy of the Student Council at Euroschool, Thane	

EXPERIENCE

Technical Product Intern, Digital Health	Purple Ribbon Healthcare June 2026 - Present
- Led early-stage product definition for Purple Ribbon's transition from offline healthcare coordination to an app-based platform; authored a detailed PRD covering functional requirements, role-based workflows, module interactions, automation logic, and operational handoffs, which the CEO shared with external development agencies - Designed a wireframe prototype for 4 core application modules, translating patient requests, nurse and caregiver allocation, and service coordination into structured screen flows and navigation for technical scoping	

PROJECTS

ResumeLens ATS - AI Resume Analysis Platform <i>Python, FastAPI, Next.js, Supabase, Groq API, spaCy, RapidFuzz</i>	GitHub Live
- Engineered an end-to-end platform that parses PDF and Word resumes, evaluates ATS structure and skill evidence, and compares resume content with job descriptions using NLP and fuzzy matching - Implemented FastAPI services, Supabase authentication and analysis history, Groq-based structured parsing, a Next.js interface, and downloadable reports; deployed across Vercel and Render	
MedSimplify - Medical Report Intelligence System <i>Python, Dash, Tesseract OCR, Hugging Face, Pandas</i>	GitHub Live
- Built a medical-report analysis application that processes pasted text and report images with OCR, biomedical named-entity recognition, and a verified 370-term glossary for patient-friendly definitions - Implemented image preprocessing fallbacks, patient-name detection, normalized and fuzzy glossary matching, entity deduplication, and a Vercel-compatible browser OCR workflow	
StockSense - Stock Movement Prediction and Explainability Platform <i>Python, Flask, scikit-learn, yfinance, D3.js</i>	GitHub Live
- Developed a next-day direction classifier for 10 US and Indian stocks using an entropy-based decision tree and 9 engineered indicators derived from two years of price and volume data - Implemented time-ordered model evaluation, 90-day walk-forward backtesting, confidence scoring, feature importance, decision-path explanations, and an interactive D3 tree visualization	
Spotify Music Analytics Dashboard <i>Streamlit, Plotly, Pandas, scikit-learn</i>	GitHub Live
Analyzed 2,000 tracks across 18 attributes through interactive filters and Plotly visualizations; standardized 9 audio features and applied K-means clustering with PCA projection for song segmentation	
Secure Banking Communication and MITM Simulation <i>Python, Socket Programming, Diffie-Hellman, AES-256-CBC, SHA-256</i>	
Engineered a three-process banking simulation with a bidirectional MITM proxy, plaintext interception, exhaustive attack over a 10,000-PIN keyspace, 2048-bit Diffie-Hellman key exchange, and a 7-test automated validation harness	

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C++, C
AI, ML and NLP: Scikit-learn, Hugging Face Transformers, spaCy, classification, clustering, feature engineering, model evaluation, PCA, Natural Language Processing, OCR
Data and Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI, Tableau
Frameworks and Web: FastAPI, Flask, Streamlit, Dash, React, Next.js, HTML, CSS, REST APIs
Databases, Cloud and Tools: PostgreSQL, MySQL, MongoDB, Supabase, Vercel, Render, Git, GitHub, JupyterLab, VS Code, Groq API, yfinance

VOLUNTEERING

Crowdfunding Volunteer - Fueladream Campaign	2021
- Raised funds to support the distribution of 45-liter water wheels for women in rural India, improving access to water and reducing physical strain - Contributed to awareness and donor outreach in collaboration with the Rotary Club of Hanging Gardens	

RECOGNITION AND CERTIFICATIONS

IDEA 2.0, PSBs Hackathon Series: Waitlisted among 1,500+ submissions; co-designed the SENTINEL concept for Zombie API detection in banking using eBPF monitoring, Isolation Forest, NetworkX, and AWS Bedrock	
Certifications: Introduction to Data Visualization - Simplilearn (2026) SQL for Analyst - DevTown x Google Developer Group and MSIT (2025)
